Chicago Wheels

SERVICE TO INDUSTRY

MOUNTED WHEELS FOR INDUSTRIAL APPLICATION WERE PIONEERED BY CHICAGO WHEEL AND MANUFACTURING COMPANY.

In fact, we have been making mounted wheels for over 40 years. No other phase of grinding has made greater progress in recent years than the use of abrasive wheels permanently mounted on steel mandrels. Method of mounting, style of mandrel or spindle and variation of grains, grades, density, bond and abrasive materials have been worked out in great detail and are largely responsible for the wide-spread use of these valuable little wheels. Countless operations formerly done by hand are now performed with speed and ease at big savings in time, materials and money. There is a proper type of CHICAGO Mounted Wheel for every job and every equipment. A trial use will prove their worth.

They are securely mounted on a steel mandrel, made from a special analysis steel and has a very high margin of safety, no matter what speed they may be operated. All CHICAGO Mounted Wheels are exclusively warranted to remain permanently mounted on the steel mandrel during their entire life. Any which loosen prematurely will be replaced free of all charge.

Chicago Mounted Wheels are economical, for they may be worn to the shank thus saving time

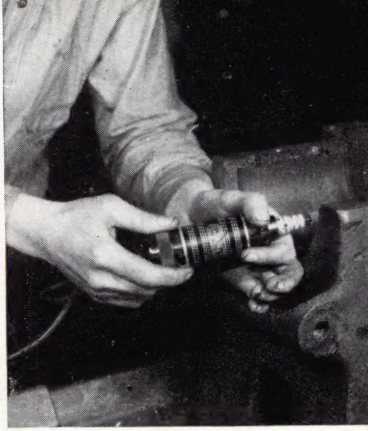
First AND FINEST

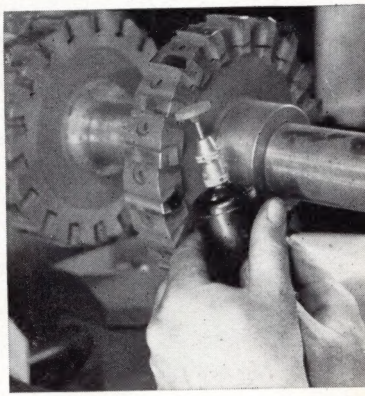
in changing wheels on the machine and increasing production. These wheels are convenient, no nuts or screws to interfere in the work. Blind holes can be ground with ease. Jobs impossible to accomplish with conventional wheels are easy for CHICAGO Mounted Wheels. They are always ready, no time is wasted in mounting with wheel screws, nuts or spindles.

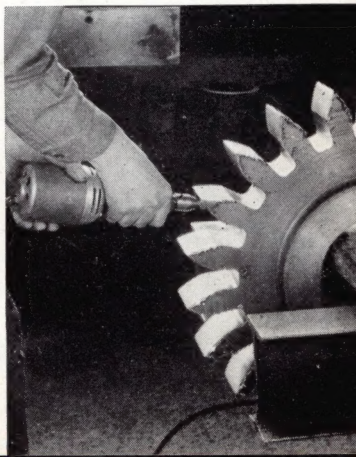
They run either way, no backing off of nut or screw when grinding reverse. This is a decided advantage on many jobs. Their utility is widely recognized because of their ability to reach hard-to-get-at places and perform seemingly impossible jobs.

They are widely adaptable, being used both in precision and offhand grinding. Limits in manufacture are very closely adhered to. They are available from the very smallest size, 3/64" diameter to the largest that might be required.

Any material can be ground with Chicago Mounted Wheels, aluminum, brass, iron, steel, alloy, bakelite, porcelain, glass, rubber—there is no other cutting tool quite so universal as a CHICAGO Mounted Wheel. As most mounted wheels are used in the smaller diameters, the higher the speed, the more efficient the results. However, they can be used at practically any speed.







Available in any grain, grade, bond or abrasive for every conceivable application. You may be certain that there is a correct CHICAGO Mounted Wheel for your job. On pages 6 and 7, you will find detailed grain and grade recommendations and suggestions on selection of the proper type of CHICAGO Mounted Wheel for many kinds of work. You can not exercise too much care when you make your selection.

HANDEE, the tool of 1001 uses, which started a new trend in portable electric tool application, was originated by CHICAGO Wheel and Manufacturing Company. This versatile unit is recommended for the small jobs . . . eliminates tedious hand work, and reaches the hard-to-get-at places. For heavier work, there is the HI-POWER Grinder, developed for jobs obviously beyond the capacity of the HANDEE. All CHICAGO Wheel products are a combination of the finest in engineering skill, experience and quality materials. You will find this helpful catalog crammed with ideas and profitable suggestions that can save you valuable time, money and materials.

Portable Tool Accessories—a wide array of hard-to-get new and original time and money saving accessories are shown in this catalogue. All are designed for high-speed production and operation and are adaptable for use on most air and electric high-speed tools. In many instances, you will find that they will spell the difference between a profit and a loss to you on difficult and perplexing contracts. Check the following pages carefully and you will undoubtedly find a number of valuable accessories that will help improve your shop production methods.

CHICAGO Wheel's long experience in pioneering and developing high-speed equipment and accessories is available to you at all times. Do not hesitate to call on us whenever you have a specialized grinding or polishing problem.

Today, if your plant is engaged in the production of war equipment you will find CHICAGO Wheel products vital for speeding up your production work, saving valuable man-hours and materials.

FOR OVER 40 YEARS

For over forty years Chicago Wheel and Mfg. Company have been manufacturing Grinding Wheels for every industrial application. Many of the present day advances in the Grinding Wheel Industry can be attributed to the pioneering efforts of this firm. No matter what the grinding problem, there is a Chicago Grinding Wheel especially fitted for the job. Our engineering facilities are at your service on any of your grinding problems. Write us today.

RECOMMENDATIONS

CHICAGO MOUNTED WHEELS

MANY of the more common operations upon which CHICAGO Mounted Wheels are indispensable are listed together with recommended grain and grade combinations on pages 8-13. Selection of the proper CHICAGO Mounted Wheel for a job is a very simple matter. There is nothing mysterious in the specifications, and the whole technique of using Mounted Wheels has been boiled down to a minimum number of standards.

ABRASIVES

The grain size used in a Mounted Wheel is largely determined by the size of the wheel. Those 1" to 2" diameter are more commonly in 46 to 60 grain; wheels from 1" down to the smallest diameters are generally in 60 to 150 grain combinations. All wheels with thin edges or sharp points are made in the finer grains so that they will hold their shape over a longer period of time.

For most jobs, CHICAGO Mounted Wheels are made in Regular Aluminous Oxide Abrasive. This gives a reddish-brown wheel of a universal type suitable for the grinding of most materials.

For low tensile strength materials like copper, aluminum, brass, glass and some plastics, green CHICAGO Mounted Wheels made from Silicon of Carbide Abrasive, our trade name "Carsilon," are recommended.

BOND

Most applications are handled with a Vitrified Bond. However, to meet unusual conditions, special bonds have been developed. When not otherwise indicated, we always supply a Vitrified Bond. As is the case with conventional grinding wheels, our bonds are varied in keeping with sizes, shapes and special conditions, so that you may be certain to get the proper type bond in every CHICAGO Mounted Wheel.

V/T SUPER BOND

Wherever the use of a tough, hard bond that will stand the "gaff" that is required, the V/T Super Bond will be found without peer. Nothing can

compare with it in durability, stamina and performance. Tests conducted in many plants from the most precise exacting operations to snagging, prove that the V/T Super Bond has from 150 to 300 per cent longer life. They are tougher, can take more punishment, grind more pieces per wheel, faster and without sacrifice of cutting action. The V/T Super Bond holds its original shape longer. The wheel will not ridge in grinding welds, sharp corners, sinking dies, barbering and other work of this character. A premium bond well worth the slightly higher cost.

RESINOID BOND

On certain specialized operations, Resinoid Bonded CHICAGO Mounted Wheels work out very well. This bond is available in most of the popular sizes and shapes. Prices and complete information on request.

CHICAGO MOUNTED POLISHING WHEELS

Here's the perfect solution for tough polishing jobs. These new CHICAGO Mounted Polishing Wheels are made with a semi-soft rubber bond, and save hours of hand drudgery in finishing tools, dies, jigs and fixtures. Impregnated in each wheel are five complete polishing compounds, in addition to sufficient cutting grit to remove scratches, tool marks, etc. Finishing and polishing become one and the same operation. This type of wheel is ideally suited for use on either precision or portable equipment, including the HANDEE and HI-POWER Grinders. Available in the more popular sizes and shapes of CHICAGO Mounted Wheels, you get in minutes, a finish that by any other method, usually requires hours of work.

Metals such as brass, aluminum, copper, monel, stainless and other alloys are easily handled with CHICAGO Mounted Polishing Wheels. A wide variety of grain and grade combinations permits them to be used on semi-grinding where several thousandths of an inch must be removed to the finest lapping operation.

You can dress the wheel to any desired shape or contour with conventional dressing tools, so that irregular shaped pieces can be polished with ease.

Everything necessary for the complete polishing job is built right into the wheel. Being fairly soft and ductile, they do not require great pressure to get results. You will save time and speed up finishing and polishing operations, presenting marked savings in many ways. The cushioning effect of the wheel makes even the most difficult polishing and finishing job easy.

Due to the shortage and restrictions on rubber, CHICAGO Mounted Polishing Wheels are only available in limited sizes and shapes. For complete information on this vital development, write for Form 971.

Mounted Wheels in the "A" Group are suited for use on all types of flexible shafts and portable equipment, having chuck capacities of 1/4", 15/64" and 3/16". Threaded shanks are available in all threads. All CHICAGO Wheel mandrels are made from a special type of steel, carefully ground and polished. These wheels, generally speaking, are too large for practical operation on the lightest equipment-chuck capacities of only 1/8" or 3/32".

CHICAGO MOUNTED WHEELS

You save time, money and materials with CHICAGO Mounted Wheels. They can be used over and over again, and are vital in today's drive to speed up production. They hold their shape . . . are easily dressed with conventional dressing methods to grind even the most elusive radii and difficult angles.

They run either way, no backing off of nut or screw when grinding reverse. This is a decided advantage on many jobs. Their utility is widely recognized because of their ability to reach hard-to-get-at places and perform seemingly impossible jobs.

CHICAGO MOUNTED WHEELS

"CHICAGO" Mounted Wheels are highly adaptable to special applications. In many instances providing the only means of doing an otherwise impossible job. You are not confined to their use on specialized equipment, indeed they can be inserted in the chuck of a drill press, flexible shaft, lathe tool post grinder, portable drill and of course the wide variety of portable grinders available. Typical on general shop applications of CHICAGO Mounted Wheels would be the sharpening of a gouge or similar tool, having a concaved surface that might be ground. High speed tool bits mounted in a lathe or other machine can be touched up without removing them. Hollow mortising chisels can be readily sharpened with a special shape provided for this operation.

Photographs of all CHICAGO Mounted Wheels are actual size, correct within a few thousandths of an inch. You actually see what you get.

CHICAGO MOUNTED WHEELS

In maintenance, precious man hours can often be saved with the use of CHICAGO Mounted Wheels. Often perishable tools can be touched up while set on the job, chip breakers ground and maintained on broaches, acorn dies ground, dies relieved while set in form on the press, all without taking down, thus saving precious man hours of set-up time. In maintenance, CHICAGO Mounted Wheels should be in the kit of every millwright and service man.

CHICAGO MOUNTED WHEELS

The wide variety of wheel shapes with convenient small size enable you to reach hard to get at and inaccessible places with ease and to perform delicate grinding operations with precision. These valuable shop allies are increasing war production on cartridge dies, diesel fuel injection valves, plane motor parts, superchargers, and a host of other vital work.

CHICAGO MOUNTED WHEELS

In arsenals and war production plants you will find skilled mechanics and craftsmen relying on CHICAGO Mounted Wheels to do a dependable time-saving job. In very few fields is this precision so vital as in the aircraft and allied industries. Manufacturers of airplane engines agree that CHICAGO Mounted Wheels are indispensable . . . the slightest error in adjustment or precision may spell the difference between life and death in the air . . . so on precision jobs, use CHICAGO Wheels.

On soft, non-ferrous metals where there is a tendency to load the wheel with metal, try running the wheel against a stick of tallow or a cake of laundry soap. Often this will keep the face free from sticky soft metals and speed the job.

CHICAGO MOUNTED WHEELS

CHICAGO Mounted Wheels can be trued and dressed with all conventional dressing methods. A wheel dressing stone, Huntington Dresser or diamonds may be used for this purpose. Diamonds or trueing tools of this type may be used on precision operation to keep the wheel true and to maintain the shape. For offhand work, an ordinary Huntington Dresser or wheel dressing stone is recommended as being perfectly adaptable.

PRODUCE SUPER-SMOO

Always apply your CHICAGO Mounted Wheel to the work carefully, until it just touches. Never jam the wheel against the work when starting the job. Always chuck the wheel with as little of the mandrel extending from the chuck as possible. The less overhang, the more better the results.

When ordering CHICAGO Mounted Wheels with mandrels in sizes not given here, specify diameter and length.

ABOVE PRICES SUBJECT TO DISCOUNT

CHICAGO MOUNTED WHEELS

"D"—largest diameter of the abrasive wheel in inches.

"T"—width, length, height or thickness of the mounted wheel in inches.

"Z"—length projection of steel shank in inches.

"Y"—diameter of shank in inches.

The length of a mandrel is always measured by its extension from the base of the wheel.

CONTOUR GRINDERS—CHICAGO Mounted Wheels are available in all required sizes and shapes for all types of contour grinders. Some of the mandrels on contour grinders are of a special type. When ordering your wheels, give us the name of the manufacturer of your equipment, as it will be helpful in furnishing you with the proper type CHICAGO Mounted Wheel.

HANDEE MODEL "44"

THE FINEST LIGHT-WEIGHT, portable, electric grinder ever developed. With over forty-four new, unusual, outstanding time and money-saving features. Light enough in weight to be easily handled with "pencil-point precision" but powerful and perfectly balanced. Features that contribute to the versatility and efficiency of the HANDEE "44" are . . . the independent smoothly-operating grinding spindle built into the handpiece. An entirely new method for accurately chucking accessories giving outstanding precision for delicate and precise work.

EXCLUSIVE QUALITY FEATURES include ease of servicing. In a jiffy you can detach the motor from the handpiece. The unit can be completely serviced by anyone. The HANDEE "44" has speed, accuracy, power and versatility, which lets you grind, drill, polish, cut, carve, sand, saw, and engrave on all materials —*faster*—without sacrificing either efficiency or precision.

SPECIFICATIONS — HANDEE "44" comes complete in a fine wood-carrying case with the finest accessories we offer. Speed, 20,000 r.p.m. with a higher maintained work speed than any tool of its weight. Operates on any 110-220 volt, AC or DC, 25 to 60 cycle electric current. Extra interchangeable spring collets available, 1/16" and 3/32" capacity; comes equipped with ⅛" and 3/32" collets. Length, 8½"; weight, 2 lbs.

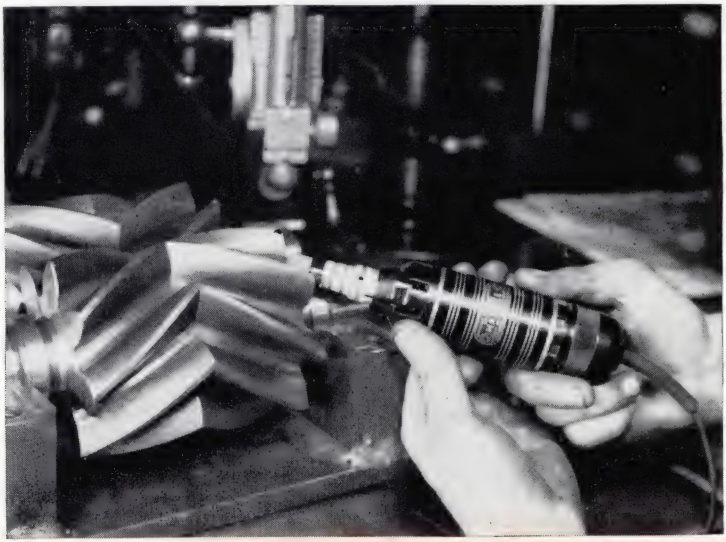
HANDEE "44" comes complete with a wide array of accessories suitable for all types of work. *Price, complete*..... **$52.50**

THE SET INCLUDES CHICAGO Steel Cutters, 5900, 5902, 5909, 5910, 5914, 5915, 5917, 5918; CHICAGO Mounted Wheels, 5B52, 5B103, 5B135, 5B170, 5W175, 5W185, 5W211; also No. 23A drum sander with 12 No. 24 extra bands; 3/32" collet; ½x½" rubber polishing point, No. 29 rubber polishing wheel; 3 No. 39 and 2 No. 17A mandrels; 12 1¼" and 12 No. 25 rubber cutting discs; No. 12S and No. 49 brushes, No. 3019 rubber cutting disc; No. 205 wheel dressing stone.

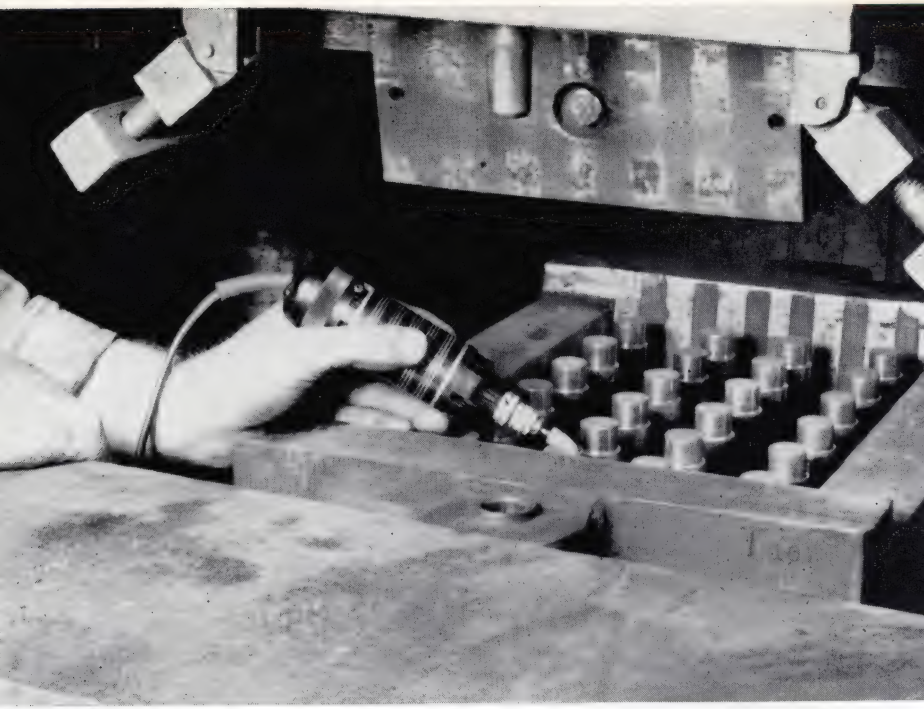
DE LUXE HANDEE

SAVES TIME, MATERIAL AND MONEY

THE HANDEE DOES AWAY WITH SLOW HAND WORK . . . grinds, drills, cuts, carves, sands, saws, engraves, sharpens, cleans and roughs. Works on any material with the over 300 accessories that have been especially designed for use with this wide utility tool. Over 200 different types of industry have adopted the HANDEE for the time and money it saves. Every craftsman, mechanic or repairman will find the tool indispensable. It reaches those hard-to-get-at places with ease. Many times this versatile tool will pay for itself on one application in the shop. Cleans up jobs that otherwise would have to be set on a machine. **WIDELY USED FOR INSPECTION, FOR MARKING AND ENGRAVING.** It handles like a fountain pen or pencil. In fact, you can mark with a HANDEE on any material as rapidly as you can write on paper.



SIMPLIFY A THOUS



THE HANDEE VERSATILITY lends itself to a host of different set-ups around every shop. Many times, hours of dead time of a machine can be saved by making adjustments while set in form right on the press, with perfect balance. Being shaped to fit the hand, you can reach inaccessible places. Made to the most rigid specifications as even the most expensive tools, De Luxe HANDEE is built with a seven-segment commutator for greater life, power, speed and stamina. You will find after you have used a De Luxe Model HANDEE for thirty minutes on any job, that it is an indispensable tool you should not be without, for many times its modest cost. Order a De Luxe Model HANDEE with one application in the shop in mind, and before you've had it long, you will find dozens of uses for this versatile tool. It licks those seemingly impossible jobs, getting into the most inaccessible places. The HANDEE is not a toy, nor is it an adaptation of a toy-like motor, but an especially designed tool imparting precision and high speed of industrial specifications at a price anyone can afford.

DE LUXE HANDEE

HANDLES AS EASILY AS A PENCIL

TIME-TESTED and reliable . . . thousands of De Luxe HANDEES are in daily use in every branch of industry. Here is a hand-full of mechanical perfection . . . perfectly controlled speed and power that will perform hundreds of jobs in your plant and quickly pay for itself in time and labor saved. Discriminating craftsmen and mechanics know by experience, that the De Luxe Model HANDEE "delivers the goods." By every standard, it is the finest tool of its kind obtainable. Guaranteed to be more powerful . . . more accurate . . . more dependable and definitely superior to any tool of its weight or type.

ILLUSTRATION AT THE RIGHT shows the De Luxe HANDEE in actual size. You can see how perfectly balanced it is . . . how it is designed to fit the hand and reach those hard-to-get-at places. Totally unlike anything you have seen before, the De Luxe HANDEE is a whole shop full of tools in one. With the wide array of accessories developed for use with this many-purpose tool, you can work on any material. Make this test in your own shop or plant . . . order the De Luxe HANDEE. Try the tool for ten days. Then, if you are not perfectly satisfied, return it to us for full credit.

BUILT TO DO TOUGH JOBS the new HI-POWER Grinder has more than enough power and performance to do the toughest of grinding jobs. Offers triple duty service in speed, stamina and economy. For any operation beyond the capacity of the lighter weight HANDEES, the HI-POWER is your tool.

The new HI-POWER Grinder is no experiment rushed to the market to meet present conditions. It is time-tested and proven, has more engineering advances than any other tool of comparable size and price. Thousands of these efficient he-man tools have been used in many different industries during the past twelve years.

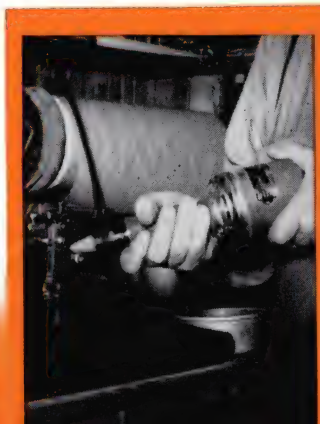
Hundreds of plants have found this triple-duty, many purpose grinder cutting both production costs and production problems. Make a trial in your own plant, test for yourself the economy and efficiency of the new HI-POWER Grinder.

A WIDE RANGE OF ACCESSORIES have been developed for use with the new Hi-Power Grinders. Not only can you use all of the smaller accessories developed for use with the HANDEE Tool of 1001 Uses, but larger ones mounted upon 1/4" diameter shank. The Hi-Power is equipped with an interchangeable spring collet chuck having collets of 1/4" and 1/8" capacity.

In every respect the constant duty tool is doing yeoman service in war industries on a host of different jobs. With a weight of only three pounds and a shape balanced and shaped to fit the hand, the Hi-Power delivers continuous vibrationless performance which eliminates fatigue and gets the work done on time.

They go far beyond the standards for ordinary grinders and incorporate many exclusive worth-while features. Built for jobs obviously beyond the capacity of the HANDEE . . . the HI-POWERS have been adopted by hundreds of plants and are giving day after day efficiency and performance. Tests prove lower operating costs for this many purpose tool. Easy and convenient to use. More than ample speed and power for the toughest jobs. A real time and money saver.

A TIME-SAVER FOR EVERY INDUSTRY

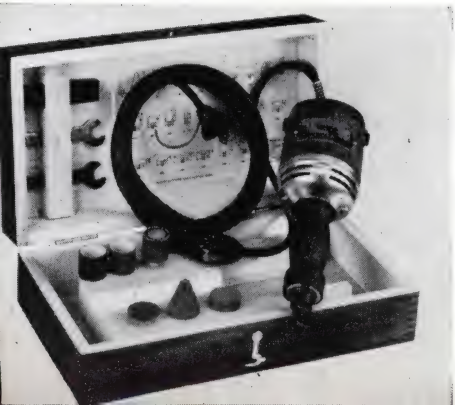


MULTIPLE TOOL EFFICIENCY...WITH SINGLE TOOL COST

HI-POWER Grinders go far beyond the standard for ordinary grinders. They bring you a definite short-cut to quickened production, greater efficiency and lower cost . . . at a time when earnings depend upon your ability to save labor . . . save time . . . reduce operating expense. They are fast, powerful and sturdy grinders built to work all day long . . . and yet so compact and convenient to use on scores of applications . . . to which rigid and other types of grinders are wholly unsuited . . . will be found for HI-POWER Grinders.

In industrial plants, pattern and die shops, foundries, workshops, garages, and other industries . . . under all conditions . . . they have won an important place in production work. Service and repairmen find the HI-POWER Grinders ideal for their repair kits.

SPECIFICATIONS—the tool is 10" overall, including chuck, with a total weight of 3 pounds. The speed is 17,000 r.p.m. with ample power to drive a wheel 2½" diameter. Included in the wooden carrying case are three CHICAGO Mounted Wheels 1 x 1" Drum Sander and extra bands, interchangeable spring collet type of chuck having a capacity of ¼" and ⅛". Bearings are precision ground of the grease-sealed type, packed with sufficient lubricant to last the life of the bearing. Housing is a sturdy casting completely insulated with cushion grips to eliminate vibration and avoid fatigue.



ACCESSORIES

A wide range of accessories are available with ¼" shank for use with the HI-POWER Grinder. Those with smaller shank give even greater efficiency when used on the HI-POWER.

We reserve the right to change accessories due to war conditions.

HANDEE PRECISION DRILL PRESS

Carefully engineered, here is a real precision Drill Press that is indispensable for drilling holes 1/8" down to the very smallest. Accurately made from seasoned gray iron casting, it is powered by the De Luxe Model Handee, which is quickly removable for regular off-hand use. And the speed you require is here in abundance. The work is brought to the drill on a 3½" carefully machined, ground and polished table, controlled through a hand knob working on a sensitive rack and pinion gear for extra-sensitive feed. Stop for depth of cut. Column stands 12" high. Table can be set for routing with permanent lock. Motor unit is adjustable on column to suit convenience in operation.

STEEL CUTTERS

Here's a group of CHICAGO Steel Cutters mounted upon 3/32" diameter shanks. Made to the same precision limits as larger industrial cutting tools, they are accurate, will give long life and outstanding performance. All CHICAGO Steel Cutters are carefully hardened and polished for fast and free work. Ideally suited for working on soft metals, wood, plastics.

No. 4925—Popular ball-shaped cutter for cross hatching, radius carving or cleaning up radii in dies. Price, each $0.60

No. 4926 — Ball-shaped cutter that gives clear, clean cuts with rapid chip clearance. Price, each .$0.60

No. 4927 — Our largest ball-shaped cutter on 3/32" shank. Recommended for free-hand use wherever radii are required. Price, each $0.60

No. 4930—Cross-hatching cutter ideal for a wide variety of work. Rapid chip clearance keeps the cutter clean at all times. Price, each $0.60

No. 4931 — For radii and round groove work, fast cutting. Can be accurately controlled. Price, each $0.60

No. 912 — Our largest flame-shaped finishing bur. Widely cut teeth, does an excellent job for off-hand engraving. Price, each, .$0.40

No. 4932 — For roughing and removing material rapidly on radii or cross-hatching work. Price, each $0.60

No. 4935 — Very popular flame-shaped cutter for rounding corners, beveling and oval cuts. Price, each $0.60

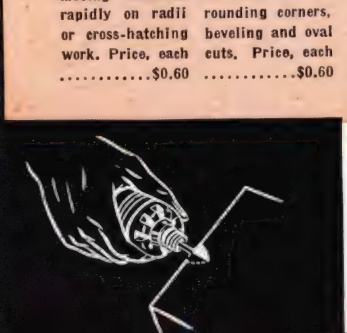
No. 4936—A flame-shaped cutter with a slightly different cut. Same rapid cutting action. Price, each $0.60

No. 4937—Faster cutting and larger bodied flame-shaped cutter, especially good for off-hand beveling and rounding work. Price, each $0.60

No. 4938 — Our largest flame-shaped cutter, mounted on 3/32" dia. Preferred for roughing and removing material rapidly. Price, each $0.60

No. 6210—Largest ball-shaped finishing bur w offer. Will mar quickly with clear cut line o nearly all mate rials. Price, eac $0.4

All Cutters Made In the United States of America



CHICAGO STEEL CUTTERS

No. 636—Variety of different cuts can be made with this finishing bur, depending upon angle at which it is held to the work. Price, each $0.40

No. 4939—Beveling and carving cutter ideal for intricate work on patterns. Gives smooth even cut. Price, each..$0.60

No. 4940—Another detail cutter generally used for roughing, breaking corners on light metals or wood. Price, each..$0.60

No. 4941—Gouging cutter for corner work and roughing out. Fast and free cutting, with ample chip clearance. Price, each $0.60

No. 4945—Detail cutter of the elongated type. Will knock down square corners very rapidly. Leaves smooth finish. Price, each $0.60

No. 4946—Roughing elongated cutter for fast removal of material. Ample chip clearance. Price, each $0.60

No. 92 — Very popular flame-shaped finishing bur for hair line engraving on all materials except hardened steel and glass. Price, each $0.40

No. 4947 — The largest elongated cutter mounted on 3/32" dia. shank. Used only for roughing work. Price, each..$0.60

No. 4950—Widely used for feature work in carving or wherever accuracy and perfect control are required. Price, each..$0.60

No. 4951 — Offhand roughing cutter. Has advantage of close, accurate control on detail work. Price, each..$0.60

No. 4955 — This dual-purpose cutter works fine in soft metals and all types of wood. Close control for accurate detail work. Price, each $0.60

No. 4956—A more rapid material-remover, with accurate control. Makes a variety of cuts depending on angle held to work. Price, each $0.60

No. 6110—General utility-shaped finishing bur, excellent for fine detail work. Price, each..$0.40

No. 4960—Roughing cutter very popular on ripping work. Can be used for a straightaway cut. Price, each..$0.60

No. 4962 — Often used in Shaper Table for rip cut on straight shaping. Price, each $0.60

No. 4961 — An ideal roughing cutter for rapid removal of soft metals and all types of wood. Price, each..$0.60

No. 64 — Small finishing bur, cylindrical type. Has extremely fine teeth for light, accurate detail work in wood, plastics or light metals. Price, each..$0.40

No. 624—For fine, hair-line engraving on all classes of material except hardened steel, we recommend this finishing bur. Price, each..$0.40

All Cutters Made In the United States of America

CHICAGO STEEL CUTTERS

CHICAGO STEEL CUTTERS 1/8" SHANK

These cutters are not intended to be used on hardened steel or other materials on high tensile strength. On this type of material, which includes glass, use CHICAGO Mounted Wheels shown on pages 6 to 34. Cutters in this group are carefully machined and polished, made to the same high standard of quality as other HANDEE accessories, designed to take full advantage of the high speed of HANDEES and other portable equipment. They can be used on slow speed equipment, but will give correspondingly less efficiency.

No. 5901—A very small ball shaped cutter for line engraving and light detail work. Price, each..$0.60

No. 5903—Ball shaped cutter for grooving, radii work. Used on wood and light metals wherever a rounded effect is desired. Price, each $0.60

No. 5900—One of the most popular of the ball-shaped cutters. Ample chip clearance gives fast, free, rapid cutting action. Price, each $0.60

No. 5905—For semi-roughing and heavier grooving work on soft metals and wood. Machined and polished. Price, each..$0.85

No. 5904—Fast cutting ball shaped cutter, ideal for roughing. A great time and money saver. Wide chip clearance. Price, each $0.85

No. 5902 — For cross-hatching, radii work and grooving, this cutter is ideal. Teeth designed for rapid, clean free cutting. Price, each $0.85

No. 5906—Our smallest end mill type of cutter, widely used for detail, touch-up work in die sinking, shaping etc. Price, each..$0.60

No. 5908—Teeth of this end mill type cutter are carefully ground and polished for long life and free cutting. Price, each..$0.60

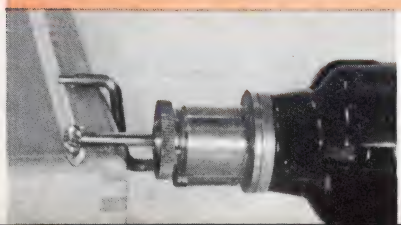
No. 5910 — Our largest end mill type of cutter for rapid chip clearance. Makes a variety of different cuts. Price, each..$0.85

No. 5911—Small saw type of cutter grand for light detail inlaying, angle cutting or scoring. Price, each $0.60

No. 5912—A faster cutter with greater depth of cut. Widely used for undercutting commutators, scoring, etc. Price, each..$0.85

No. 5913—Depth of cut on this cutter can be regulated by using shank as depth gauge. Saws, undercuts, inlays. Price, each..$1.00

All Cutters Made In the United States of America



No. 5914—End mill type of cutter for angle cutting, undercutting and mold work, etc. Price, each $0.85

No. 5915—This cutter is exceptionally fast-cutting and ideal for roughing. Ground to a taper, it removes material in a hurry. Price, each $0.85

No. 5918 — A smaller countersinking cutter for nearly all materials except hardened steel. Leaves a smooth, clean cut. Useful in simulating chip carving. Price, each..$0.85

No. 5917—A beveling and carving cutter. Ideal for roughing on wood or metals, unbeatable in roughing plastics. Price, each..$0.85

No. 5907—This is the cutter to use for rapidly roughing out designs in all types of plastics. Price, each $0.85

No. 5909—This cutter has wide utility for it makes a number of different type cuts depending upon the angle at which it is held to the work. Price, each..$0.85

No. 5919—A V-type of grooving cutter widely used in carving to simulate fur on animals, leaves on trees, etc. Price, each $0.85

No. 5898—Barrel-type of cutter, especially designed with rapid chip clearance, generally used only for roughing. Price, each..$0.85

No. 5899—Engravers prefer this type of cutter for smoothing down radii or working bead work. Price, each $0.85

No. 5920—A V-groover that is exceptionally fast-cutting used for similar applications as No. 5919. Price, each..$0.85

No. 5921—Countersinking cutter that is a wonder. Fast, free and cool-cutting, with wide chip clearance. Price, each..$0.60

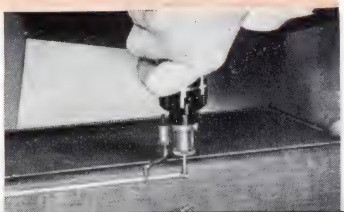
No. 5916—This taper cutter is ideal for spotting, counter-sinking in wood or light metals. Price, each..$0.85

These miniature cutters are real helpmates on many jobs. Indispensable to the die, tool and pattern maker. Work equally well on the highest speed equipment. Sturdy 1/8" shanks are adequate for all sizes and shapes of cutters shown on pages 52 and 53. While these cutters can be re-sharpened, the detail and time involved usually make this operation uneconomical. *All Cutters Made In the United States of America.*

No. 5922—A special purfling tool that is ideal for purfling, inlaying, undercutting. Makes cut 1/8" deep and 1/16" wide. Price, each.$1.25

No. 5923—Purfling tool. Makes a cut 1/16" deep and 1/16" wide. Popular for violin work. Price, each $1.25

No. 5924 — Our fastest, coarsest roughing cutter. Indispensable for roughing out wood carvings, plastics and patterns. Price, each.$1.25



CHICAGO STEEL CUTTERS

Designed for operation on the Hi-Power Grinder and other equipment larger than either the Standard or DeLuxe Model Handee these cutters are made from the finest quality steel, carefully machined and ground to precise limits. They are in every respect precision cutting tools. Widely used in die shops, pattern shops and by wood sculptors they work equally well in wood or metals of low tensile strength. In roughing dies that are not hardened they will be found to be great time and money savers. Steel cutters have teeth designed for operation with high speed equipment and always provide rapid chip clearance.

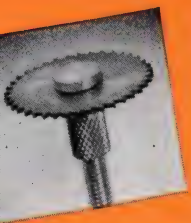
SAWS



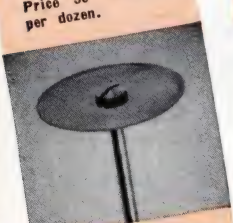
For high speed operation with the Handees on plastics, wood and soft metals. Catalog No. 27* ¾" dia. .023" thick, ⅛" hole. Used with mandrel No. 16. Price each, saw only . . . 75c. Also Catalog No. 28* for detail inlaying, purfling and undercutting ¾" dia. .002" thick with ⅛" hole. Used on mandrel No. 16. Price each, saw only..75c

Catalog No. 25. A thin rubber cutting disc ⅞" dia. 1/64" thick, 3/64" hole. Used with mandrel No. 17 or 17A. Cuts any material, even glass. Price 5c each, 35c per dozen.

Catalog No. 26*. For precision work. ½" dia. saw .023" thick with ⅛" hole. Mandrel head serves as automatic depth gauge. Ideal for undercutting commutators. Used with mandrel No. 16. Price each, saw only....60c

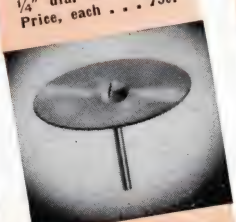
Catalog No. 19. Undercutting saw, permanently mounted on mandrel 3/32" dia. For slitting, undercutting, radial chassis or light detail inlaying. ¼" dia. .033" thick. Price, each . . . 75c.

Catalog No. 20. Permanently mounted saw with a mandrel dia. of 3/32". On larger commutators this 3/8" dia. .033" thickness saw is recommended. Shank serves as depth gauge in wood-working. Price, each..75c



Catalog No. 3018. Extremely thin saw. Cuts light materials with lightning speed. Indispensable to model builders. 7/8" dia. only .005" thick with 3/64" hole. Used with mandrel No. 17 or 17A. Price, saw only...50c

Catalog No. 3016. Larger dia. saw, recommended for use with Hi-Power and Handees. Works on wood or light metals. 1½" dia. .023" thick with ¼" hole. Used with mandrel No. 3014. Price, saw only..$1.25



Catalog No. 3017. Largest saw recommended for Hi-Power or Handees. 2" dia. .032" thick, ¼" hole. Suitable for wood, plastics or light metals. Used with mandrel No. 3014. Price, saw only . . . $1.50.

Catalog No. 5025. Stagger tooth saw for the Handee Workshop. Cuts wood and plastics remarkably fast. .025" thick, 2" Dia. ½" hole. Used with mandrel No. 3014. Price, saw only $1.50

Catalog No. 3019. Rubber cutting disc, 1½" dia. 1/16" thick, with ⅛" hole. Used with mandrel No. 16. Indispensable for model making, smoothing, cutting or grinding. Price, each...40c

Handee Saws are made to the same high standard of quality as all our accessories. Only the finest quality steel carefully ground and polished is used. Manufactured in their entirety in the United States. You can purchase these accessories with absolute confidence for satisfaction is guaranteed.

***Ground and polished, concave both sides for fast, free cutting.**

POLISHING

These new polishing wheels will save you many hours of work in getting smooth surfaces on metals or plastics.

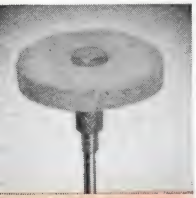
NOTE

Due to the shortage of rubber, Catalog Nos. 29, 30 and 41 are subject to restriction at any time, and your purchase order must be covered by priority preference rating.

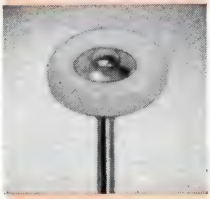
Catalog No. 29. Most popular "CHICAGO" Soft Rubber Polishing Wheel used with the Handees. (See description of new polishing material, Page 56.) Dia. ⅞", thickness ⅛", hole ⅛". Used on mandrels No. 16 or 39. Price, Wheel only 20c

Catalog No. 30. Wide purpose rubber polishing tip of "CHICAGO" Soft Rubber Polishing Bond. Gives high polish on any metal. For mandrel No. 21 or 21A. Price, tip, only, each...15c

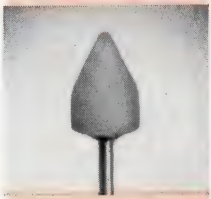
Catalog No. 41. All-purpose soft rubber polishing tip. 1" long. Often used for rough-finishing gems. Use mandrel No. 3013 or 3013A for mounting. Price, tip only, each 15c



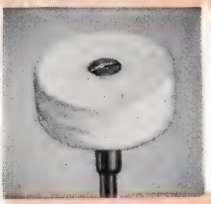
Catalog No. 33. Felt wheel for superlative finish on virtually all materials. Used with Handee Polishing Compound. Dia. 1", thickness ⅛", hole ⅛". Used with mandrel No. 16 or 39. Wheel only, price, each . . . 20c.



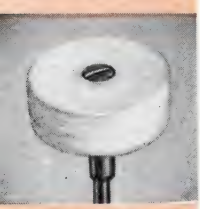
Catalog No. 13. Felt polishing wheel permanently mounted on ⅛" dia. mandrel. Only ⅝" dia., ideal for hard - to - get -at - places. Polishes more efficiently with Handee Polishing Compound.
Price, each 20c



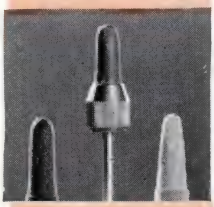
Catalog No. 31. Small felt polishing tip. Uses mandrel No. 21 or 21A. Invaluable for delicate and intricate work. Handee Polishing Compound recommended for use with this wheel. Price, tip only, each 20c



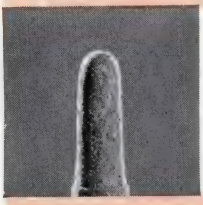
Catalog No. 56. Felt wheel 1" diameter x ¼" thick for all types of polishing, mounts on mandrel No. 16 or 39.
Price, felt only, 30c



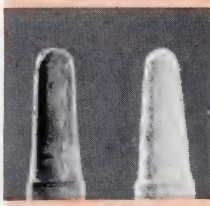
Catalog Nos. 57, 58, and 59. Small rag buffs are ideal for use with Handee and other high speed portable equipment. Available in three sizes for mounting upon mandrels No. 39 and No. 17.
Price, each.....$0.25



Catalog No. 3050. Handee Grinding and Polishing Kit for tools, dies, jigs, fixtures, etc. Includes quick-change chuck mandrel No. 3051; CHICAGO Polishing Point, felt polishing point and grinding point. 1/8" mandrel.
Price, complete.$2.00



Catalog No. 3053. Grinding Point for quick-change chuck mandrel No. 3051 shown at left. Molded to fit the chuck, a real time and money saver.
Price, each.....$0.40



Catalog No. 3052. Felt polishing tip for use with quick-change chuck mandrel No. 3051. Price, each, $0.35
Catalog No. 3054. CHICAGO Polishing Point for use with quick-change chuck mandrel No. 3051. Price, each.....$0.25

MANDRELS

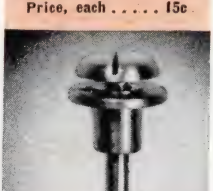
Catalog No. 16. Precision made from the finest steel. Used with accessories Nos. 26, 33, 27, 28, 29, 3019 and 49. For accessories having 1/8" hole dia. of shank is 3/32". Price, each 40c

Catalog No. 17. Screw type mandrel for accessories with 5/64" hole, including catalog Nos. 25, 81, 82, 83, 84 or No. 3018. With 3/32" diameter shank.
Price, each 15c

Catalog No. 17-A. Screw type mandrel for accessories with 5/64" hole, including catalog Nos. 25, 81, 82, 83, 84 or No. 3018. With 1/8" diameter shank.
Price, each 40c

Catalog No. 21. Special shoulder type screw mandrel for mounting rubber polishing points No. 30 and No. 31. With 3/32" dia. shank. Price, each.... 45c. Catalog No. 21-A. Same, with 1/8" dia. shank.
Price, each 45c

Catalog No. 3013. You can use this special long screw shoulder-type mandrel for mounting soft rubber polishing point No. 41. With 3/32" dia. shank. Price, each .... 60c. Catalog No. 3013-A. Same, with 1/8" dia. shank.
Price, each 60c

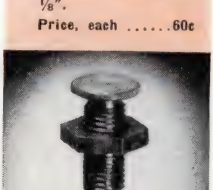


Catalog No. 3014. Special mandrel with screw top for accessories having 1/4" dia. hole. Used with Catalog Nos. 3016, 3017 and 5025. Shank dia. 1/8".
Price, each 60c

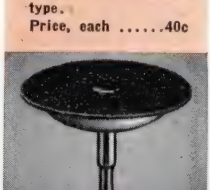
Catalog No. 39. Heavy 1/8" dia. shank screw-type mandrel. Used with accessories having 1/8" hole. Catalog Nos. 29, 33 and 49 work well with this type.
Price, each 40c

Catalog No. 40. Nut type mandrel for accessories with 3/32" hole. Shank 1/8" dia. Widely used by craftsmen for mounting many different accessories.
Price, each 40c

Catalog No. 3039. Special mandrel for close quarter work. 3/8" head for accessories with 5/16" hole. Small knurled 3/8" retaining nut. 1/4" shank.
Price, each 75c



Catalog No. 3015. Wheel adapter mandrel for use with Hi-Power Grinder only. You can use wheels up to 2 1/2" dia. not exceeding 1/2" in thickness. Shank 1/4" dia.
Price, each 60c



Catalog No. 112. New type mandrel for mounting discs from smallest to 1 1/4" diameter. Gives rigid backing to disc. Used with sanding discs Nos. 22, 46, 47, 48, 71, 72, 73. Available only on 1/8" dia. shank.
Price, each.....60c

Mandrels for every type of accessory and purpose are here illustrated. Use them in your portable tools with assurance that you are getting the best money can buy. Like all HANDEE *materials, guaranteed to give you long, trouble-free service.*

BRUSHES

Catalog No. 11. Easy-to-use bristle type brush ½" dia. for cleaning, removing rust and many other applications. Permanently mounted on 3/32" shank.
Price, each 20c

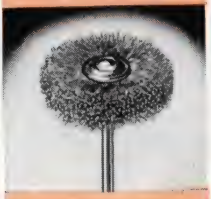
Catalog No. 12. Cup-shaped bristle cleaning brush. Reaches hard-to-get-at places with ease. Permanently mounted on 3/32" dia. shank for convenience.
Price, each . . . 20c.

Catalog No. 12-S. A wire cup cleaning brush for cleaning molds, rough from steel parts, etc., Permanently mounted on 3/32" dia. mandrel, it has wide utility for variety of applications.
Price, each 75c

Catalog No. 14. Bristle-type cavity cleaning brush ¼" dia. with bristles extending ⅜" from the base. Ideal for deep cavities and hard to reach places. Permanently mounted on 3/32" dia. shank.
Price, each 20c

Catalog No. 14-B. Bronze wire brush, popular with gunsmiths, for all types of cleaning, reload, ferreling, etc. Brush ¼" dia. Wire extends ⅜" from base of brush. Permanently mounted on 3/32" dia. shank. Wire .005".
Price, each 40c

Catalog No. 14-S. Same as 14-B ¼" dia. with steel wire .005" extending ⅜" from base. For satin-finishing model work, etc. Permanently mounted on 3/32" dia. shank.
Price, each . . . 40c.



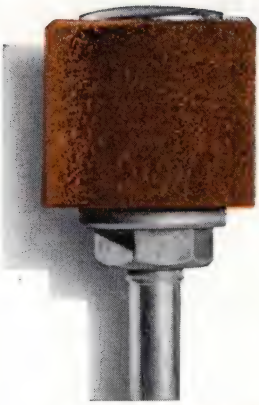
Cat. No. 15. Wire scratch brush. Wire .005. Brush 1" dia. Mtd. on 3/32" dia. shank. Price, each .50c
Cat. No. 15A. 1/8" dia. shank. Pri. ea. 60c
Cat. No. 15½. Heavier scratch brush. Wire .005. Brush 1" dia. 3/16" thick. Mtd. on 3/32" dia. shank.
Price, each 75c

Catalog No. 49. When you need an extra-stiff wire brush order this type. Mount it on mandrel No. 39 or 16. Brush 1" dia. Wire .0075". Can be used on all Handees and the Hi-Power.
Price, each . . . $1.00.

Catalog No. 3012. This 2" dia. brush is for use with the Hi-Power. Ideal for giving a satin finish, cleaning up, etc. Comes complete with ¼" dia. mandrel and wire used is .0025".
Price, each . . . $1.60.

INDUSTRY RECOMMENDS

The wire brushes shown on this page are available only in the specifications given. Under present conditions, no deviation can be made in sizes and shapes. In the event you have a special cleaning problem and do not here find what you require, lay the details before us, and we will be happy to give you the benefit of our experience. For further cleaning accessories see CHICAGO Sanding Drums and Bands, pages 60 through 62.



DRUM SANDERS & BANDS

Chicago Abrasive Drum Sanders and Bands give an ideal smooth fine finish to either wood or metal. The bands are of lapless construction, can be run in either direction. The edges will not ravel. Drum sanders are available in a wide variety of sizes. The bands can be quickly applied. They are available in coarse, medium or fine.
